

IN-HOUSE SERVICE CAPABILITIES

From concept to completion, Jobmaster Magnets provides a complete in-house service including design/engineering, manufacturing and packaging. Other value-added services include retail bar coding, full service metal fabrication, machining and Waterjet cutting services. These provide customers with options to streamline their supplier chain.

DIVERSE PRODUCTS AND INDUSTRIES

Magnetics provide thousands of useful solutions in manufacturing processes and for finished products. Jobmaster Magnets' products range from sweepers and separation devices to handling magnets which lift, hold and position. We service diverse industries including heavy steel fabrication, automotive, aerospace and manufacturing of electronic components. As specialists in magnetic technology, we possess the necessary equipment and expertise to create a single prototype or mass produce items for your specific requirements.

OVER ONE MILLION MAGNETS STOCKED

We offer customers unequalled access to all commercially available magnetic technologies. This enables us to respond quickly to your specific volume requirements. Our inventory exceeds over one million discrete magnets and miles of flexible strip and sheet magnets. This product diversity, in combination with our efficient production facilities, provides fast delivery of 'just-in-time' orders.

CUSTOMIZED SOLUTIONS

"If you can think it, we can build it" is our commitment to our customers, and the foundation of our company. From design to prototype to testing to manufacturing to packaging. Challenge our design team to explore a solution for your next project.
